TELEGRAPHIC NEWS BRIEFLY CHRONICLED

SAPIRO GIVES UP TO N. Y. POLICE

NEW YORK, Sept. 7—Aaron Sapiro, New York lawyer, well known in Western Canada, who was arrested here last July as a fugitive from justice in Chicago where he was indicted with Al Capone and 23 others for conspiracy, surrendered at Tombs prison on Thursday.

Governor Herbert H. Lehman on Wednesday granted the Illinois application for the lawyer's extradition.

Under Bail

Sapiro, who helped organize farm co-operatives in the Canadian West, had been at liberty under \$1,000 bail pending hearing on the fugitive charge on September 11.

David Siegal, counsel for Sapiro, said he planned to go immediately before Supreme Court Justice Julius Miller and apply for a writ of habeas corpus for his client.

Assistant District Attorney Irving Tell said he would ask the justice for an adjournment of the proceeding until Friday, as he expected Chicago authorities to be here by that time to claim their prisoner.

Justice Miller held a brief hearing on Siegal's application for writ of habeas corpus and adjourned the case until Friday.

W. I. Meeting

The Women's Institute met at the home of M. L. Chapman, on Wednesday of last week. There were seventeen members present and two visitors.

After the routine business was disposed of, Mrs. J. W. Shier who was in charge of the program presided. After having given a short talk, she then called on Mr. Scott, school inspector, who spoke on "Education and Better Schools." Mr. Scott's address was very instructive and interesting.

The next speaker was Lorne Proudfoot, M. L. A., who spoke on the same subject. He stressed the necessity of having a general and practical knowledge as well as book education illustrating same. He also said in his opinion the school fair was a good thing as it gave an added interest along the line of agriculture to the pupils. At the close of Mr. Proudfoot's address he brought up the subject of the necessity of having a doctor and hospital in the district and as it has been rumored that the Cereal hospital might be closed Mr. Proudfoot suggested that if the Women's Institute would send a petition in to the government asking if they could give some assistance, it might enable us to keep the doctor and hospital at Cereal. The addresses given by both gentlemen were very much appreciated.

The matter of a doctor and hospital was taken up by the W. I. and it was decided to send a petition to the government at once. A dainty lunch was served at the close with Mrs. E. B. Allen, of Heathdale district and Mrs. Chas. Bennett hostesses.

Observe Armistice and Thanksgiving As Separate Holidays

OTTAWA, Sept. 13—Repeated inquiries coming to Ottawa suggest a recurrence of the old confusion about Thanksgiving Day and Armistice Day. Thanksgiving will be observed on October 9. Armistice Day will be on November 11. Each will be a separate public statutory holiday.

For a few years the two occasions synchronized, Thanksgiving being fixed for the Monday of the week in which November 11 occurred. It was objected by the Canadian Legion that this deprived the Armistice of fitting recognition so the law was changed and the old system was reverted to.

While Armistice Day is a fixed holiday on November 11, Thanksgiving, from year to year, is now fixed by order-in-council. It is usually planned, however, to be, at his year, on the second Monday of October.

School Fair To Be Held Saturday, 16

The Chinook and district School Fair will be held this coming Saturday, September 16, in the Chinook Agricultural Hall. The students of all the different schools are showing a greater interest than ever and there will be a larger number of exhibits on display this year than last.

The sports committee, consisting of Messrs. Elford and Nordin, would like to have all the entries for the athletic events in by 10:30 a.m. Saturday morning. With prospective contestants practising hard every day, the sports should prove to be one of the main attractions of the day.

As cattle, horses, sheep and swine have been eliminated from the prize list, no judges are provided and no prizes nor points will be awarded in these classes.

Brief News Nuggets

The Government is sending in potatoes for sale at 35c a bushel. See secretary of village or of the Municipal District.

CHINOOK ADVANCE

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export, wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the great exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to meet her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium, all of which countries took large quantities of imported wheat either directly from the country of origin, or indirectly through the London and Liverpool markets. Then came the Great War, wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada, equal almost to enlisting in the army, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson. Italy learned it. France learned it, and, while not directly involved in the war, Spain learned it through the high price she had to pay for wheat and other imported food commodities.

For a time after the war, while the necessary work of reconstruction of their countryside and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, meet their own requirements and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay excessively high prices on the other hand in the event of a further war or other emergency. They offered bonuses to their farmers to produce wheat, they fixed uneconomic high price for domestic grown wheat, they imposed prohibitive tariffs on imported wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of which is Canada, while the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain. But, Premier Bennett pointed out, whereas European countries in 1930 produced approximately 900,000,000 bushels of wheat, in 1933, just three years later, they produced 1,220,000,000 bushels, an increase of 320,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 75,000,000 and 100,000,000 more bushels of wheat than Canada; Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada. These countries were the former buyers of our Canadian wheat; now they are producing more than Canada.

Mr. F. E. Murphy, who was the United States Government delegate to the wheat conference in London, gives the wheat production of these four European countries this year as 1,015,000,000 bushels, against Canada's estimated crop of 300,000,000 bushels, Argentina's 220,000,000 bushels, Australia's 174,000,000 bushels, and United States' 499,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Danubian countries—Hungary, Roumania, Yugoslavia and Bulgaria, will produce in the neighborhood of 127,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her own people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear—fear of starvation in the event of another war which contingency is still hanging over Europe, and fear of ransom, or, in other words, of being again compelled to pay excessively high prices for imported wheat in order to stave off starvation,—the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown to wheat by the four largest exporters of wheat; and, on the other hand, for no further increase in production by European countries, except Russia, for a removal or some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual reduction in the tariffs now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undeniably of vital interest to the people of Western Canada and provide much food for serious thinking and planning on their part.

"I seem to know you. Did I once lend you money?"
"Did you get it back?"
"Yes."
"Then you don't know me."

Like America, Australia had no cattle until European explorers came there.
Paris plans to build many schools.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of legions of Canadian mothers during 88 years it has been on the market. Don't experiment. Get Dr. Fowler's and be on the safe side.

Progress In New Gold Fields

Large Amount Of Work Done On Labrador Claims

Remarkable progress has been made already in the Labrador gold-fields, according to Hon. W. J. Walsh, Newfoundland's Minister of Agriculture and Mines, who has returned to St. John's from the Lake Wabush district.

He was accompanied on the expedition by Dr. O. K. Snelgrove, geologist, and J. W. Foote, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile aeroplane trip from Seven Islands, Quebec, had a population of 39 when they left.

Mr. Walsh and his party spent a week in the interior. They said they were "unusually scarce." Unsettled weather conditions had interfered somewhat with the work of the field parties but despite a remarkable amount of work had been accomplished.

ASHAMED OF HER FIGURE

Husband Persuaded Her To Take Kruschen

By following her husband's advice, this woman made a tremendous improvement in her appearance—she actually took off 32 lbs. of her excess fat. Telling of her experience, she writes:—

"A year ago I was troubled with rheumatism, nervousness and other complaints. And I got so fat that I was ashamed of my figure. I was persuaded by my husband to take Kruschen Salts. Before I began, I weighed 131 lbs. After taking Kruschen for a short time the rheumatism was less painful, my nerves got stronger, and my sleep lighter. I knew that Kruschen was doing me good, so I persevered with it and got my weight down to 129 lbs. I had a reduction of 32 lbs. of unwanted fat. I am not boasting when I say that I feel younger and more active, have a much better figure and am healthier than I have been for years."—(Mrs.) J. S.

Kruschen is a blend of six mineral salts which assists the internal organs to throw off each day those waste products that would otherwise accumulate in the form of fatty tissue.

Founded Centuries Ago

History Of Bavarian City Dates Back For 1,700 Years

In this year of centuries, tricenaries and bicentenaries all over the world, the Bavarian boosters of Weissenburg are inviting all and sundry to celebrate with them the 1,700th anniversary of their city's founding.

It was back in 233 that the hardy local tribesmen first broke through the fortified military road built by the Romans, destroyed the citadel of Birciana and built with its stones a castle called the Wisvurg. Remnants of the city wall erected at that time, with 31 towers and a number of big gates, still remain. The Ellinger gate, in particular, is considered one of the finest medieval structures of its kind in all Germany.

Miniature Paintings

Microscope Needed To See Fine Work Of English Artist

Painter of miniatures so small that 20 of them will fit on a postage stamp, Stanley A. Burchett, of London, formerly of the Grenadier Guards, claims that they are the smallest pictures in the world. Two, about an eighth of a postage stamp in size, have been purchased by the queen. One is a seascape showing a sailing vessel at dawn, and the other a still-life of marigolds in a blue vase. To appreciate the pictures fully it is necessary to use a microscope. Many find it difficult to believe that the miniatures are real water-colors painted with a brush.

Dentistry In Olden Times

Even the ancient Egyptian had to be told to "open wide" and probably had trouble with his false teeth dropping out occasionally, according to Dr. J. K. Lowry, McGill University specialist in the branch of dental science. He told of dental work done by the Egyptians as early as 3400 B.C., in a talk before a local service club. He also described known traces of dentistry among the Greeks, Etruscans and the Romans.

Japanese tea exported during 1932 showed an increase of 4,072,000 pounds over 1931.

More than 250,000 persons are now employed by the British post office department

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first, to Paris and then to Sevres, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and scientific measures of weight are based. At Sevres, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1889.

The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce.

The prototype is made of a platinum alloy called iridium-platinum. In spite of the high resistance of this metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament.

Plans for the journey were kept secret lest bandits might attempt to steal the prototype. A kilogram of iridium-platinum is worth several hundred pounds sterling as metal alone, while a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 20 in existence—one for each of the principal nations.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria where he will take over military district No. 11, which includes the province of British Columbia and the Yukon Territory.

Brig-General T. V. Anderson, D.S.O., district officer commanding military district No. 10, with headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and is understood Brigadier W. B. Seaman, D.S.O., whose appointment to command military district No. 11 became effective a short time ago, will go to Winnipeg to succeed Brig-General Anderson.

Long Trip For Pilanes

British Machines To Fly 12,000 Miles Over Africa

Three large British troop-carrying biplanes are detailed to make later this year the longest, and most ambitious formation flight yet contemplated over the breadth of the African continent—a journey of 12,000 miles from Cairo in the east to Bathurst and Dakar in the west. Their route goes south as far as Khartum and thence westwards over French Equatorial Africa, Nigeria, the Gold and Ivory Coasts, Sierra Leone, the Gambia and Senegal. They will fly over thousands of square miles of territory which were unexplored less than a generation ago.

France has ruled that motion picture films in foreign languages can be shown in only 15 theatres in the country.

A new high-speed passenger and mail plane in Germany has a speed of 226 miles.

Freight Car Was Elusive

Ex-Sergeant Proved He Did Not Abandon His Post

An ex-sergeant brought an atmosphere of comic relief into the military tribunal at Paris, which is still hearing appeals from war-time court-martial sentences when he successfully appealed against a sentence passed in 1918 of 15 days' imprisonment for twice abandoning his post.

Sergeant Nigon was ordered to escort a freight car containing 5,000 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

The railway authorities assured him it would come back. It turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gas mask.

In reply to questions he said he did not sleep in the box-car because a soldier was only allowed to sleep in a horse car during the war. If he had slept next to it on the track he would not have been able to shut the door. He declared he did not abandon his post because a post is a fixed point and the box-car was a movable object.

"It was a phantom car," he said. "It kept disappearing."

He was acquitted and the sentence quashed.

Air Permeated With Gas

Carbon Monoxide From Cars Menace To Human Life

Subjected to a "gas-attack" of increasing intensity from automobile exhausts, residents of large cities may some day "require the wearing of gas-masks in self-defence," says Sir W. I. De C. Wheeler, medico-sociologist, who is the honorary fellow of the American College of Surgeons.

Light on the unseen effects of the motor-car upon human life was thrown by Sir William at the meeting of the British Medical Association in Dublin.

Permeation of the atmosphere with gases from autos accounts for an unestimated portion of the annual death rate, he said.

"The blood of traffic policemen has been found to be charged with carbon monoxide at a high concentration, and the blood of those who constantly move in cities must be similarly polluted."

An Interesting Swap

United States Museums Trade Specimens Of Extinct Birds

The Carnegie Museum now has a great auk and the National Museum at Washington has a cahow—most of a cahow anyway—and therein lies a tale of barter among scientists.

For one mounted skeleton of a great auk, the Carnegie Museum gave the National Museum a "practically complete skeleton of a cahow."

Both the great auk and the cahow are—or were—birds, now extinct. The auk, a native of Bermuda familiar to crossword puzzle people, was a very large bird which moved around at night and buried itself in the sand by day.

The cahow, a pretty large bird too, stayed in the far north.

Tornadoes are the swiftest of winds, travelling as fast as 400 or 500 miles an hour.

Chance Meeting Recalls Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subs" was recalled at Montreal harbor when Captain R. H. Monks, deputy port warden, boarded the steamer "Clan Alpine" in the course of an inspection.

Accosted by a member of the crew who asked if he remembered him, Captain Monks found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain Monks' ship had been torpedoed off the Irish coast. About to jump into the one remaining lifeboat the ship's master heard groans from some place on the deck. Returning he found a member of the crew, badly wounded. Picking the man up, Captain Monks carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

After two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the wounded man was given treatment.

Has Radio Wave Pains

Tacoma Dairyman Is Obligated To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Bodker, dairyman in the Tacoma district, who suffers intense pains from radio waves unless he grounds himself.

Tacoma and Seattle specialists have declared they were baffled. Bodker some years ago began to suffer intense pain. Physicians could find nothing wrong with him, but the pains much like rheumatism, persisted from time to time.

One day he put his hands on a water faucet while suffering pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Human Loud Speaker

Official possessor of the toughest lungs in the United Kingdom, W. B. Anglin, town crier of Marlborough, Wiltshire, England, aged 53, won the championship from twelve rivals in the National Town-Criers annual contest at Lyne Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Commodity prices in Belgium are increasing.

"LIPSTICK GIRL," etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his time telling her about Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms.

(Now Go On With The Story.)

CHAPTER VIII.

When Camilla and Peter had graduated the weeks of their longing for love of each other with incoherent words and repeated kisses, Peter held her off and exclaimed, "To think how near I came to losing you! And I should have, if you had not told me the truth!"

"That was why I dared to tell you, because I was to. And at the time, I was sure that when I did it would be the end. There was no explaining the way things happen, is there?"

Peter was silent for a minute, then turned aside from her suddenly and exclaimed, "But, Camilla, don't you see, dear—you're not being Miss Hoyt makes it all the more impossible for you to love me."

"What do you mean, Peter?" alarmed.

"Because I have no money, either. I can't take care of you—oh, for years—perhaps never. Mrs. Hoyt is right—you must find someone to love who has plenty of money to take care of you."

"But didn't I just tell you that I was preparing to take care of myself?"

"Oh—that! For awhile—yes. But you must think of your future."

"That is just what I am thinking of—what my future would be without love."

"Surely, there is someone you could care about who has money and influences that will give you the happiness you deserve. He did not sound very convincing but he was trying to be generous."

"There is no one in the world who can make me happy, except you, Peter. She pressed her head close on his shoulder like a forlorn child seeking protection."

"Precious! Camilla, you make me wild. If only I could make you happy!"

"You can if you love me enough," softly.

"Love you! I love you too much! But I can't take care of you for ever so long, and perhaps I never could give you what you have had."

"Will you stop saying that, Peter?" she demanded severely. "I don't want the things I have had—ever. I want you—oh, Peter, darling, I love you so! Don't send me away from you." Her hands reached up and clasped around his neck. Her lips lifted to his. Peter took them, eagerly, lost to all practical reasoning.

"They murmured together. 'I won't, darling, I promise. We'll find a way.'"

Presently, it was Camilla who drew away suddenly and exclaimed, "Why, Peter, it is you who should marry a girl with a fortune, so you can be free to study and work without worrying about money. That would mean everything to you. I'm sorry I forgot your side of it, Peter, dear. I go away and take care of myself and find someone else." Now it was Camilla who tried to be cheerful and convincing and generous.

Peter drew her close with an indulgent laugh. "You precious little goose! What should I have to work for if I lost you? Having you would be my surest chance of success, Camilla. With you for my inspiration, the sky's the limit for me. We shall dream and work together, you and I. There are dreams in your eyes, that promise me so much, darling. How we shall live, together!"

"You are sweet!" she told him, timidly caressing his face.

"But I haven't told you all about me, dear. I have no family here, except some older brothers and sisters

who are married and involved in their own affairs. I lost my mother and when I was only a kid, and I lived with my oldest sister until I could take care of myself. I wasn't very old when I started on my own."

"Such a brave little fellow you must have been! Why should I be afraid that you can't take care of me some day, then?"

"Well, that's different. I get along somehow on my very little. You are sure you don't mind that I came to America in the storage class and my mother wore a shawl over her head?"

"Why, Peter Anson! Why should I mind that? So did my mother come to America with a shawl over her head and suffer the bewilderment and fears of Ellis Island."

"What's the difference, anyway," she continued, "just a few generations? We all came from across the Atlantic, yet the first arrivals scorn the later ones. Because they beat us to it, I suppose. But as soon as the biggest high-hats have prospered with freedom and the democracy that they never practice, they go back where they came from. They 'go abroad' to exploit their wealth to the poor relatives they left behind, to get continental culture, to absorb the genius of great foreign masters or revel in the historical grandeur of the old world. Even you believe that to complete your education, you must go abroad. Then why are you ashamed to have come from there?"

"You are marvelous!" Peter, declared solemnly.

"So are you! Do you know what you reminded me of the first time I saw you?"

"Aye tank aye go home?" he laughed.

Her finger tapped his cheek with gentle reproach. "Of course not! Will you stop being ridiculous? You always make me think of Viking ships and brave adventurers in search of

conquest and new lands. You are like your beautiful, brave country. Your hair is like the gold of the sun that never sets in that long northern summer, your strength is like the rugged cliffs of the coastline, your eyes are like the sparkling blue ice of the stern winters."

He chuckled with joy at her delightful fancy. "Do I still remind you of an iceberg since I've kissed you?"

"No, I've changed my mind about your being an relation to ice. You must be the fire of the northern lights, the son of Aurora Borealis," she bantered.

"Just for that, I'll burn you up," he warned her, kissing her again. He held her away to exult in her beauty.

"I shall tell you what you remind me of?"

"Please do! I hope it is something very nice."

"Everything nice—of sunny southern skies and brilliant flowers, intoxicating fragrance and sparkling blue waters, of glamorous tropical moonlight and music-and-gay laughter."

"I hope I always shall remind you of such lovely things, Peter."

"Happy, dearest?"

"So happy. I shall never be unhappy again."

"Or blue?"

After awhile, he said, "But we haven't planned for the future at all. There is so much to decide. Everything is different now."

"Peter," she said severely, "if you let our love change your plans and ambitions the least bit, I shall be very unhappy."

"But I didn't have you in those

plans. Now I have you and want to fit you into them from the beginning.

"Please tell me just what you had planned to do before you found me." Her tone was as matter-of-fact as if they were only new business partners.

"But that is the past—before I found you," Peter objected.

"Tell me, anyway," she insisted.

"Why, there was nothing very definite except that I was going to work very hard and sacrifice everything to succeed. I had planned to enter something in the National exhibit next fall to compete for the Paris scholarship. On the long chance that I won it, I hoped to make enough to pay my expenses over there by doing anything I could—just as I've worked my way through National. Perhaps a guide or interpreter. I know French pretty well—and Swedish and Scandinavian."

"I have Spanish and French and some Italian," Camilla added. "We might start a foreign language school."

"Or build a tower of Babel," she laughed.

"We'll let the children do that," she reminded him, slyly.

"A frog that is covered in hair and another that has claws."

Mr. Sanderson stated that he had two gorillas, one of which died in captivity.

The natives, he said, are convinced that the gorilla is a "retrograde human being," with habits that are human, but they considered that the chimpanzee is definitely a monkey.

"In the Assam district," he added, "we discovered an uncharted mountain range, which appeared geologically to be of comparatively recent formation."

"Our most thrilling experience was when we were lost in thick virgin jungle. We were surrounded by impenetrable forest, and then one day we sensed rather than heard, the sound of native drumming, and by following for a day and a night we came to a native village and so found ourselves again."

Beautiful Indian Capital

Everything in Jalpur is Built On Fairland Basis

The Maharajah of Jalpur, who has been in the limelight more than once of late, returns to it again by winning the Prince of Wales' Cup at Hurlingham with his polo team. His native Jalpur sounds like an odd ball dream for everything there seems to be built on a fairland basis. The houses in the capital are painted in every conceivable shade of pink and purple, delicately traced with patterns of other colors, and light green shutters are on every window.

There are peacocks in the streets, and the royal stables near the palace are crowded with horses and elephants. A touch of realism is added by the Maharajah's private observatory, but even that is unusual, for it contains the world's largest sundial.

Already he has visited Denmark, Germany, Ireland, Scotland, Norway and Sweden, and already his pockets are bulging with recipes which he has obtained in foreign lands.

After a short sojourn in Turkey he is off to France, Italy, Spain, Portugal, South Africa, Australia, America and Canada, where he hopes to secure thousands of appetizing recipes.

His novel work-search for recipes will take him six years—and at the end he should be the most knowledgeable chef in the world.

Norway will boost government taxes.

Canadian-made shaving brushes are on sale in Belgium.

Retirement Well Earned

Two Sisters Served As Missionaries For 35 Years

Coral stone churches on scattered South Sea Isles, a school for Micronesian boys and girls, the Bible and other Christian literature and school textbooks translated into Kusaian—these were some of the results of the work of two American sisters who started out from Newark, N.J., 35 years ago and now have just been retired.

The sisters are the Misses Elizabeth and Jane Baldwin, and their retirement was voted by the American Board of Commissioners for Foreign Missions.

For 20 years the sisters were the only white persons on the small island, Kusia, on which they lived. They nursed the islanders through sickness; remained with them through hundreds of furious tropical storms, and helped them through succeeding families.

After translating school books, with their own hands the sisters prepared for printing. Books were laboriously turned out on an old hand press until, on their twenty-fifth anniversary in the islands, a machine press was sent from Boston.

Everything has been done or planned by the two women. Thus, when a cement reservoir and typhoon house was built, Miss Elizabeth supervised the erection herself.

Members of the First Presbyterian Church at Newark, they sailed to the island first under the Woman's Board of Missions, now united with the American Board. In all their years in the islands they never had accepted any compensation.

Only once have they visited America, in 1911. Miss Elizabeth, who was 39 when she left America, is now 74 and nearly blind. Miss Jane, who was only 25 when she sailed is now 60.

THE RHYMING OPTIMIST

By Aline Michaelis

HOW FRAIL IS BEAUTY

How frail a thing is beauty To touch the heart-strings so! The swirl of dancing shadows, The willows bending low, The jade and emerald wave, The far-flung, breaking wave; How frail a thing is beauty, That yet a life can mold!

O, beauty, let me clasp you And hold you close always, Walk with me in the splendour Of morning's golden haze; Reveal your still reflection Upon the sleeping lake, And greet me with the twilight When starry hosts awake!

A gleam, a hint a promise A sunset's fleeting gold; How frail a thing is beauty, That yet a life can mold!

A Strange Illusion

Telescope Convinced People Man They Saw Was Not Flagpole Winner

A flag-pole sitter in Montreal seemed impossible at the office staff of one of the upper storeys of the Aldred Building were sure that they saw a person seated on a stool atop a flag-pole on a nearby building.

For many minutes the amazed audience gazed intently at this new spectacle. Only after a powerful telescope was sent for did they discover their mistake. The telescope revealed a man sitting on a stool on the roof of a building beyond the one which supported the pole. Strangely enough from all sides optical illusion caused the man to appear to be seated on the flag-pole. He sat still for more than 30 minutes and this added to the deception.

Waterspout Chases Ship

Huge Volume Of Water Follows Liner Five Miles

A waterspout playing tag with an ocean liner was the adventure experienced by passengers on the "Duchess of Bedford" during a violent wind storm. The liner was on her way down the St. Lawrence from Montreal to New York on a cruise.

The giant spout, which measured 60 feet across the base and at times as much as 500 feet in height, chased the liner for almost five miles at a speed of approximately 17 miles per hour, passengers reported.

Accurate Sunning Up

Motor speed law was thus summed up in a court of appeal in connection with a court case arising as the result of a motor car accident: "This court has said three times, and I want it to be generally known, that if you are going at such a speed that you cannot pull up within the limits of your vision, and an accident happens, you are in the wrong."

Increased demand for coffee is boosting business in Salvador.

WANTED—The news from every part of the Chinook district. Send it in.

Motor Truck Delivery

Prompt Service, Prices Reasonable
M. L. CHAPMAN .. Chinook

Wheat-cutting is now general in Manitoba and under way in the other prairie provinces, according to a recent weekly report issued by J. M. McKay, general agricultural agent, Canadian Pacific Railway, Western Lines. There is still, however, great need for further moisture, especially in the central and southerly parts of the grain-growing provinces.

Fresh from a victory in which he carried an appeal for a Chinese sentenced to hang, to the Privy Council, ending in commutation to life imprisonment, Rev. Father Joseph S. Donovan, of Maryknoll, N. Y., landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

SECURITY and PROTECTION

Grain growers, the length and breadth of Alberta, should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building up of a strong elevator system on a strictly grower controlled, co-operative basis. Having this in mind the best course to follow is to

Deliver Your Grain To
